

Viking Analytics AB

Data Scientist

About Us

Viking Analytics is a fast-growing company that enables the industry 4.0 with AI! We help asset-heavy companies to predict and prevent expensive machine downtimes and performance degradations of their processes and assets. From 2018 we have developed a state-of-the-art data exploration tool, MultiViz that is now in the market. We see an increasing demand for our products and services and that's why we want YOU!

Your Role

You will be working closely with our clients in a number of exciting industrial projects. You will use the latest techniques in AI and Machine Learning to develop algorithms for range of different applications to build robust and scalable machine learning algorithms for some of the world's largest organisations as well as for small fast-moving companies on the edge. You will also learn from unique challenges of deploying data analytics solution in industrial environment.

An essential part of your role is to work with our customers and collaborate with their team of engineers and data scientist to design innovative data solutions. Hence you need to have good communication skills and able to collaborate well with others. It is also necessary to be able to engage with stakeholders to understand their needs and requirements to be able to deliver a product that fits our customers need.

Your skills

Must haves:

- Well-experienced programming in Python and at least one more programming language
- Having worked with version control such as SVN and Git
- Strong communication skills, fluent in English

Nice to have:

- Experience in front-end development is a plus.
- Experience in agile project management and customer relations
- Experience in implementing deep learning functionality
- Knowledge or experience with big data frameworks

Offer

We offer full time employment. You will take part in digital transformation, intelligent products, enterprise architecture to define, develop and implement the first-generation Industry 4.0 solutions. You will be working in an enthusiastic and friendly environment that we all thrive in.

Our office at MobilityXLab is in the centre of the Science hub of Lindholmen in Göteborg with all possible opportunities.

How to apply

To be considered for this exciting opportunity, please submit your details to apply@vikinganalytics.se.
