

Viking Analytics AB

Full stack developer

About us and your role

We, at Viking Analytics, are in an exciting phase of growth and are driving smart manufacturing in an unprecedented manner. Our technology is enabling domain experts in the heavy industries to build reliable smart manufacturing applications with high quality labeled and organized sensor data. These applications include predictive maintenance, root cause analysis and process optimization. We are looking for a talented senior full-stack developer to join our core development team. You will have many responsibilities and work on all parts of our MultiViz product.

Your skills

Experience with the following is wanted: C#, dotnet core, javascript/typescript, React, web APIs. Experience with the following is additional (but makes it more fun): Python, algorithm optimization, machine learning, jupyter, pandas, numpy.

Offer

We offer full time employment. You will take part in digital transformation, intelligent products, enterprise architecture to define, develop and implement the first-generation Industry 4.0 solutions. You will be working in an enthusiastic and friendly environment that we all thrive in. Our office at MobilityXLab is in the centre of the Science hub of Lindholmen in Göteborg with all possible opportunities.

How to apply

To be considered for this exciting opportunity, please submit your details to apply@vikinganalytics.se.
