

Full stack developer

About Us

Viking Analytics is a fast-growing company that enables the industry 4.0 with AI. We help asset-heavy companies to predict and prevent expensive machine downtimes and performance degradations of their processes and assets. During the last two years we have developed a state-of-the-art data exploration tool, MultiViz that is now in the market. We see an increasing demand for our products and services and that's why we want YOU!

Your Role

You will be working in our team of developers in several exciting industrial projects. You will use the latest techniques to develop solutions for a range of different applications for some of the world's largest organisations as well as for small fast-moving companies.

Your skills

We see that you to have experience in C#, dotnet core, Typescript, React, REST API. You will easily collaborate with the rest of the team and are used to take own initiatives. If you have skills in Python, algorithm optimization, jupyter, ClickOnce installation or Microsoft Azure you may be approached to take on even more challenging tasks.

Our Offer

We offer a full-time employment. You will take part in our push into the digital transformation to create, develop and implement our state-of-the-art product MultiViz. You will be working in an enthusiastic and friendly environment that we all thrive in. Our office is located at the Lindholmen Science Park in Gothenburg, Sweden.

How to apply

To be considered for this exciting opportunity, please submit your details to apply@vikinganalytics.se.
